Introduction

- LaTeX is pronounced "lay-tech" or "lah-tech," not "la-teks."
- LaTeX is a document preparation system for high-quality typesetting.
- LaTeX is most often used to produce technical or scientific documents, but it can be used for almost any form of publishing.

Overview

Designed by academics and easily accommodates academic use.

Professionally crafted predefined layouts make a document really look as if "printed."

Conclusion

Often times, you make a mistake when creating a document. You will notice the log file reporting a problem.
